

PPI Standard Pipe Colour Chart

The following standard colours are readily available for customer specified MDPE and LDPE pipe. Selecting one of these colours for a special project requirement will reduce the production lead time. Specifying, trialling and approving a colour outside this range will require 2 to 4 weeks before the production run can commence.

The colours can be used in solid pipe or in stripes or jackets. Changing the material colour takes time and this needs to be accounted for in the cost of the pipe. The cost can be reduced by selecting solid, stripe or jacket, combining the production run with other orders or by large volumes. It is important to specify the performance requirements of the pipe so that the best production method can be adopted to provide a competitive special order quote for both price and availability.

Colour	Common Use	
Dark Blue	Water – PE100	
Light Blue	Water – PE80	
Orange	Electrical Conduit	
Dark Yellow	Gas – PE100	
Light Yellow	Gas – PE80
